All plants offered in this list are strong, field grown, two-year-old transplanted, unless otherwise specified. Our plants will bloom in full glory the first season after planting. Packing extra at cost.

ROCK AND ALPINE PLANTS

The demand for Rock and Alpine Plants is without question a prominent one and here to stay. You will lose business by not having a good collection to offer. Plant a collection in your trial grounds where people can see them and they will buy.

GENERAL LIST OF PERENNIALS

For the Hardy Border and Cut-Flower Purposes

In selecting a general line of Perennials for all purposes, please consult all other groups listed. The necessity of florists having "a patch of Perennials for cut-flowers" is beyond question. It furnishes a continuous supply of flowers when other flowers are scarce within your immediate reach. No ordering, waiting nor express charges and bills to pay. You will be surprised what it will do for you. Do not forget varieties under Novelties and Daisies when ordering. STRONG, FIELD-GROWN STOCK

All varities suitable for cut-flower purposes are marked with a (*).

HARDY PHLOX

(Our National Garden Flower)

We possibly grow the best Phlox that is being handled, because of our splendid soil and our liberal selection. Our collection of varieties is without question the best that is being grown anywhere. We believe in Phlox. They are the best garden flowers we have. Our Mr. P. Weller went to Europe last year and picked up a lot of new and splendid varieties, some of which we are listing this year, and many more to come in the future. All our Phlox are strong, one-year-old field-grown plants with all the roots as dug. No better plants on earth.

Traveling in Europe last summer, Mr. P. Weller was surprised at the popularity of this variety or class of Dahlias over there. Everywhere he observed most gorgeous and striking beds of these beautiful flowers, in parks and private gardens, along boulevards and driveways, and he made up his mind that if anything should be introduced in America it be the MIGNON DAHLIA.

These are unsurpassed for bedding plants where quantities of flowers are required during the summer months. These single-flowered Dahlias attain a height of about 18 inches and begin to flower early in June and continue to do so until frost. The flowers are about 2-3 inches across and the colors are most striking, from pure white to golden yellow and orange and from light pink to deep carmine red and purple. They should be set about 18 inches apart in beds in June, either in the border or solid beds.

Where one desires a great deal of color, we strongly recommend the Mignon Dahlia.
